

## FOOD AND FIBRE

Task: to design and make a model of a technology that could assist with or actually produce a type of food or fibre.

Choose one of the design briefs below and begin your model or design.

### **OPTION 1:**

Design a 'Free Range Pork' brand

1. **Design** a 'Free Range Pork' brand for a new line of free-range pork products that are soon to be released in Australian butchers and supermarkets.
2. The free-range pork will include cuts such as pork fillets, pork loin steaks, mince, pork cutlets and easy carve roast.
3. The label **MUST** be a unique design – attractive to the public and accurate information how the product is produced.

The following information must be in your design:

- The words '**Australian Free Range Pork**' must be on the design.
- The **words** 'Accredited by the Australian Pork industry Quality Assurance Program' (APIQ) and endorsed by the RSPCA **must** be part of the design.

On card paper **DESIGN** and **COLOUR** the brand label.

## **OPTION 2**

### **Design and make a model pig farm**

1. **Discuss** your ideas with your group.
2. What type of pig farm will you **design** and **create**?
3. **Sketch** some ideas.
4. **Decide** on the best idea.
5. **Complete** a labelled design – list all the parts needed to make it.

### **Evaluate**

- Your design and **WRITE** a paragraph about this task.

### **Include**

- Details on the quality of your planning
- Your finished design
- How well you worked with your group and
- If you enjoyed the task.
